<b>Office Action Summary</b>	<b>Application No.</b> 10/791,518	<b>Applicant(s)</b> BRADLEY ET AL.	
	<b>Examiner</b> ELIZABETH ROSEN	<b>Art Unit</b> 3692	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 3/1/2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. **Claims 1-18**, drawn to verifying the authenticity of an asset based on the identification information from a unique identification tag, classified in **class 340, subclass 5.1**.
  - II. **Claims 19-23 and 39-45**, drawn to an identification tag and reader, classified in **class 340, subclass 572.1**.
  - III. **Claims 24-30**, drawn to an apparatus for acquiring identification from an ID tag that is associated to an asset, classified in **class 340, subclass 572.1**.
  - IV. **Claims 31-38**, drawn to determining whether a party to an agreement is complying with the agreement based on an identification tag for an asset, classified in **class 340, subclass 5.1**.
  - V. **Claims 46-54**, drawn to determining whether a party is complying with an agreement based on audit information, classified in **class 340, subclass 5.1**.
  - VI. **Claims 55-61**, drawn to remotely auditing an asset using a hash, classified in **class 707, subclass E17.052**.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II, III, IV, V, and VI are related as combination (Group I) and subcombinations (Groups II, III, IV, V, and VI). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because subcombination II has separate utility because it is a system for remote verification that includes an asset, ID tag, reader, server, communications link, and database. Subcombination III has separate utility because it is the apparatus that is used for reading identification information which includes a housing, processor, memory, display, and bar code. Subcombination IV has separate utility because it includes the limitation of comparing the identification info that is read with the expected identification information and determining whether the party to the agreement is complying with the agreement. Subcombination V has separate utility because includes auditing an asset in order to determine whether a party is complying with an agreement. Subcombination VI has separate utility because it creates a hash based on information obtained from an identification tag.
4. The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any

claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

5. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
